

Attachments for Industrial Forklifts

Industrial Forklift Attachments - Lift truck platforms provide much more versatility for individuals who work off of a forklift. These platforms are helpful machines for the reason that they provide a high level of safety for workers on top of them as well for the people under. Forklift platforms are an inexpensive solution for companies as they are much more cost effective than obtaining specialized machines. These platforms are even desirable because they could save a lot of storage space. To capitalize on the advantage and full potential of this machinery, you will need to find the lift that best fits the work tasks you have in mind.

Platforms that slip onto lift truck forks are simple to set up and lock into place. Slip-on style lift attachments have become more common because they are easy and quick to function. They provide an inexpensive answer for companies that do not need them on a regular basis. These platforms have a railing system in position, skid proof decking and tie offs available. They still require the use of safety equipment by workers but come with these particular features to be able to further the safety of those who will be using them. Slip-on work platforms are the perfect alternative for those projects which take place in difficult spaces or over top of an object.

This kind of table lift can be attached using a pin after sliding the table onto the forks. The industrial lift stand provides extra protection with a safety screen covering the rear and three rails. For added safety, it is a better idea to consider choosing a style which opens through the front railing rather than the side gate model.

Stock pickers could attach onto a forklift using the same foundations as other platforms but are much different. Stock pickers often have a much slighter base surrounding by a front guard screen and railings on three sides. This particular unit differs from the several platforms in view of the fact that the cage and the surface do not take up the entire fork surface area.

Combination platforms prove very helpful when workers need a large amount of materials in order to complete a project intended at a tall height. This particular kind of platform has a superior base section and a safety screen around a smaller section. This design is vital so that staff could finish their job and not have to concern themselves about any materials sliding onto them if the one operating it tilts or tips the things.
